

We are working hard to keep our patients and staff safe and supported during the **COVID-19** pandemic. It's not over yet!

Steps we are taking to increase safety:

COVID-19 testing for all staff, based on CDC guidelines for long-term care.

Certified and fit-tested N95 or surgical masks, face shields, goggles, gowns and gloves worn at every patient visit.

Internal COVID-19 taskforce that stays up to date on CDC guidelines.

Staff always screened when they visit the office.

Telehealth visits available when needed.

Using CDC-recommended PPE for all in-person visits.

Support available:

- Phone and video appointments from your home.
- Visit www.obengmd.com for more information.
- On-call support **8-hours** per day
- After-hours primary care provider available by phone every day.
- Our primary care team coordinates directly with caregivers to ensure patient needs are met quickly
- Team-based clinical care to ensure that your physical, psychosocial and spiritual needs are being addressed.
